

Hassan Tahseen

Full-stack web developer

07708246418 | t.d.cc.hassan@gmail.com | <https://github.com/ht3aa>

Full-stack web developer having great knowledge of PEVN stack (Postgresql, Express.js, Vue.js, Node.js). I also have acceptable knowledge of Next.js, React.js, and Nuxt.js and great experience with HTML, CSS, Javascript.

EDUCATION

THIRD DEGREE | BIOMEDICAL ENGINEERING | UNIVERSITY OF TECHNOLOGY

Major: Medical devices.

PROJECT

APR 2022-MAY 2022

Matlab Bag | Front-end development

A website that contains files and videos which explain Matlab software easily and simply. <https://matlab-bag.vercel.app/>

- I used next.js (React framework) for development and Vercel for deployment

JAN 2022-JUN 2022

Covid-19 | Full-stack development | Project with team epassion:

A website that contains information about covid 19 and how to protect it. also contains the nearest centers that provide vaccines for covid.

- I used react.js for front-end development and my teammate used express.js for back-end development.

APR 2022-JUL 2022

Excel bag | Front-end development

A website that contains files and videos which explain Excel software easily and simply. <https://excel-bag.vercel.app/>

- I used next.js (React framework) for development and vercel for deployment.

APR 2022-current

BIT Team | Team project

A website for bit team which covers all the services they provide and their projects and customers.

- I used next.js (React framework) for development and vercel for deployment and GoDaddy for the domain name.

JUN 2022-JUN 2022

English bag | Front end Project

A website that contains files and videos which explain English language easily and simply. <https://eng-bag-v2.vercel.app/>

features:

- 1- Downloadable lecture files, voice records.
 - 2- You can read the lecture while listening the voice record or the videos
 - 3- responsive website
- I used next.js (React frameword) for development and vercel for deployment.

FEB 2022- FEB 2022

Student Registration system | Full-stack project

Project to make the registration of a new student in the university an online system

features:

- 1- responsibility system (Admin, supervisor, manager) each one has some privilege from the other.
 - 2- add, update, and delete for branches, departments, and students.
 - 3- morning study, night study
- I used react.js for front-end development and express with mongo.db for back-end development
